# Our employees make HCP a great place to work

As an organization, we care about our providers, our patients, our community and each other. At every level, employees are offered the opportunity to succeed — competitive salary and benefits, collaborative team approach and professional development.

And it makes receiving the honor of Top Long Island Workplaces that much sweeter — knowing that our employees are as happy to work here as we are to have them here.

Thank you—and here's to another great year together!
