

Webinar Schedule

2023 Schedule	Webinar Name	Webinar Description	Dates
January	Ring in the New Codes for 2023	Get the latest updates for coding of the most prominent conditions seen in primary care	Jan 24th & 26th 2023
February	Shadowing the Essential Elements of Risk Adjustment and HCC's	Learn all about the mechanics of risk adjustment and proper HCC assignment	Feb 21st & 23rd 2023
March	The Ultimate Guide to Documentation and Coding	What you need to know about documentation and coding for stable, uncomplicated, complex, and exacerbated chronic conditions	March 28th & 30th 2023
April	Don't Be Fooled . . . Social Determinants of Health are Key Factors for Your Patient Population	Learn about screening, documentation, and coding for social determinants of health that are impacting the physical and behavioral health of your patient population	April 25th & 27th 2023
May	Blooming Into the Comprehensive Evaluation of Neurological Disorders	Make the connections to properly document and code for neurological disorders commonly managed in primary care	May 23rd & 25th 2023
June	Incorporating Wellness...Evaluating Substance Use, Chronic Pain, and Behavioral Health	Fine tune your screening, documentation, and coding for these often-missed disorders	June 27th & 29th 2023
July	Feed Your Knowledge of the Most Common Gastrointestinal Disorders	Fill up on documentation and coding guidance for the most common gastrointestinal disorders	July 25th & 27th 2023
August	Control Your Knowledge Related to Diabetes and Associated Conditions	Learn documentation and coding for all diabetes related manifestations and conditions	Aug 29th & 31st 2023
September	Accurate Documentation and Coding for CKD and Associated Manifestations	Deep dive into the proper staging, documentation and coding for CKD and associated complications	Sept 26th & 28th 2023
October	The Heart of the Matter...Proper Documentation and Coding for Cardiovascular Disease	Get to know the details of documentation and coding for the most common cardiovascular conditions	Oct 24th & 26th 2023
November	Getting to the Cellular Level of Coding for Cancer and Hematological Conditions	Uncover the skills necessary to overcome the challenges of correctly documenting and coding the most common Cancers and Hematological Conditions.	Nov 28th & 30th 2023
December	What's in the Air? Updates to Coding and Documentation for Respiratory Disorders	Work through some of the most frequently treated diseases of the Respiratory System highlighting documentation and coding for Chronic Obstructive Pulmonary Disease, Asthma.	Dec 19th & 21st 2023
